

# SPACE TANKS

By: Paul Iradi

## Description:

Space Tanks is an Asteroids inspired game about defeating enemy tanks that roam across the screen. You can't leave the battlefield, so dodge the enemies and shoot them down!

## Controls:

W/S - Move tank forward or backwards.

A/D - Rotate tank left or right.

Space - Fire a bullet! (Your tank is from the future, and therefore has no cooldown on firing shots!)

## Cool Features:

- Amazing 3D Modeled tanks using Unity!

- Extremely realistic sound design. There is no sound in space!

- Glorious futuristic technological improvements that allow the physically impossible to happen! (In space!) This is DEFINITELY not a cop out for any incomplete features in the game, I promise.
